International Workshop on Food Loss and Waste Prevention targeting Mediterranean countries

November 4th, 2021 from 09:00 to 17:00 (CET)

Introduction

This workshop on food loss and waste (FLW) is part of a series voluntarily organised by Thünen Institute after 2015 annual Meeting of G20 Agricultural Chief Scientists (MACS-G20) emphasized the decisive importance to reduce FLW. As result of that decision, the Collaboration Initiative Food Loss and Waste was established under German coordination. The Johann Heinrich von Thünen Institute, as German Federal Research Institute for Rural Areas, Forestry and Fisheries, hosts the coordinator. Since 2017 annual regional workshops are organised dedicated to the respective G20 presidency country - which is Italy in 2021 - and the neighbouring region. The present organisation team includes FAO Rome (Italy), UN Environment (France), University Bologna (Italy), University Tuscia (Italy), RSC talent (Spain) and Thünen Institute (Germany).

The aim of the workshop is to support the delivery of SDG Target 12.3, halving food waste at retail, food service and household level, and reducing food loss across the supply chain as well as to facilitate the cooperation and network building among Mediterranean countries. Due to the pandemic, the length of the workshop was shortened to one day virtual meeting. The topics therefore have to focus on selected issues which have been identified as relevant challenges within the region: Food Loss in Primary Production, Food surplus and waste from tourism activities as well as Addressing Food loss and waste in educational campaigns.

As the Mediterranean region is characterised by the influence of three continents and corresponding culture, policy, infrastructure, legislation and climate conditions, we invited contributors from all three subregions to share their valuable knowledge on FLW prevention. The programme follows our strategy to enhance knowledge exchange and structured discussion among our participants in order to support action. Each session consists of introductory plenary presentations to provide input on the specific session topic followed by group working guided by key questions. A final plenary session is scheduled in order to allow a broader discussion of the interrelation of the three session topics and the context to other levels of the food supply chain and to summarise the results.

Date und time: November 4th, 2021 from 09:00 to 16:45 (CET) – Please connect in good time before the start of the workshop so that any technical problems can still be clarified.
