UN CLIMATE CHANGE CONFERENCE

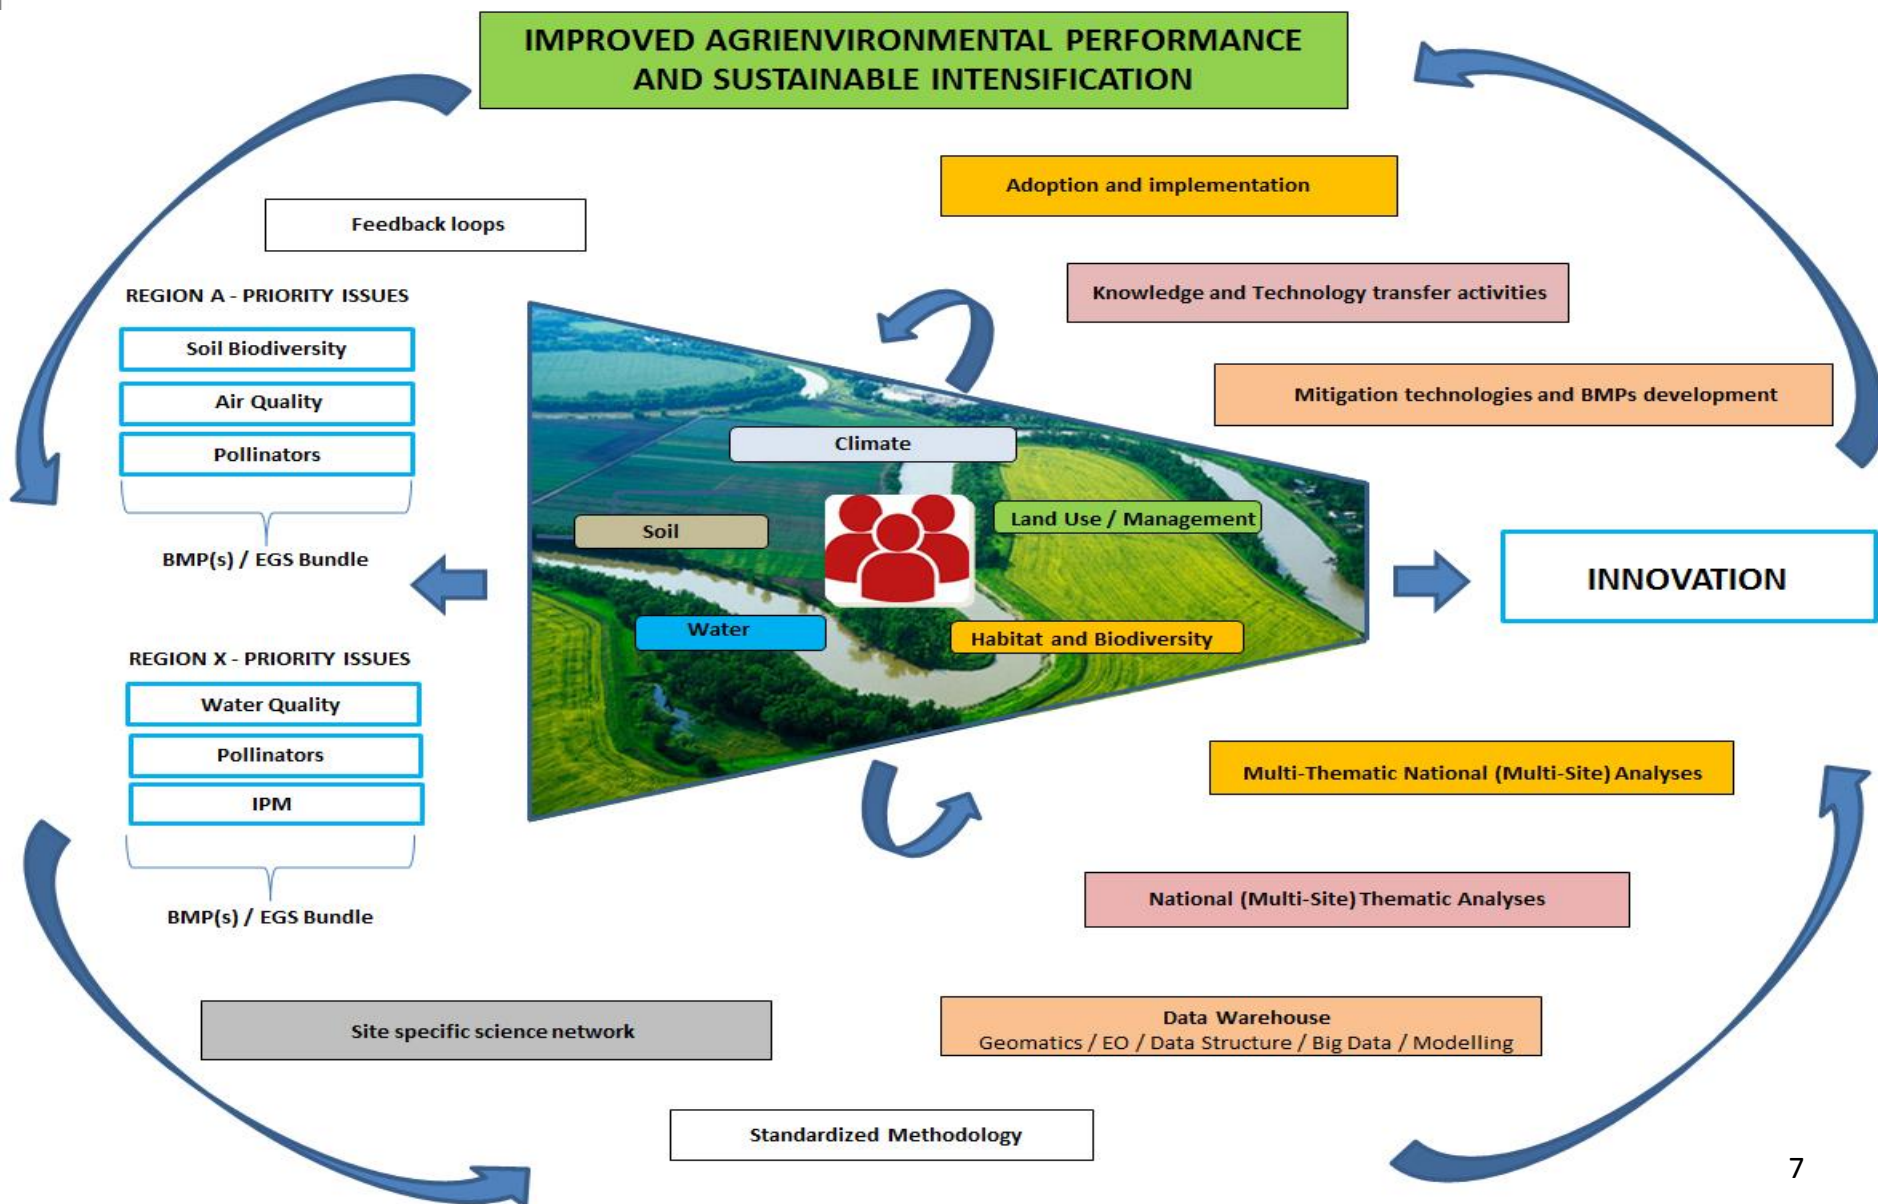

# A New Approach is Required

- The challenge: How to provide a growing population with sufficient food, fiber and fuel (FFF) without using unsustainable agricultural practices?
- How to significantly accelerate both the development and adoption of beneficial management practices (BMPs) ?

# Agroecosystem Living Labs (ALL)

## Core principles

- Place-based activities in a working landscape
- Co-development with end users
- Interdisciplinary, systems approach
- Accelerated adoption

## Desired Outcomes

- Greater resilience in agricultural landscapes
- Improved agri-environmental performance, and
- Attainment of sustainable intensification

# ALL Concept and its Application is Growing

- Various initiatives in G20 countries underway using core principles to a varying degree

Country	Example
Brazil	Integrated crop-livestock-forest systems
Canada	Network of sites in various agroecosystems under development
France	Laboratoire d'innovation territoriale Ouest Territoire d'Élevage
United Kingdom	North Wyke Farm Platform
United States	Long-Term Agroecosystem Research (LTAR) Network

# Canada's Approach

- We are in the process of establishing a coordinated, long-term, nationwide network of sites where producers, companies, non-profit groups, research organizations and governmental institutions collaborate to develop, assess and implement innovative solutions that are rapidly adopted to address persistent agri-environmental issues.

# Key Areas of Focus in Moving Forward

- Co-development approaches with end-users
- Better integration of natural and social sciences
- Recruitment and development of human resources with key skills
- Data management and standardization
- Evaluation of the benefits of ALL versus the potential costs of status quo

# The Opportunity for MACS

- Raise global awareness of need for ALL to accelerate progress in attaining sustainable intensification
- Work together in areas of joint interest bilaterally, regionally, globally
- Learn from each other by sharing experiences

# Possible Next steps

- Discussion session at MACS 2018
- Use MACS Communique to emphasize need for accelerating the adoption of BMPs via the core principles of ALL
- Pursue further cooperation
- In-depth discussion at MACS 2019 on country experiences
- Workshops and side events to promote the approach

**Thank you!**

**¡Gracias!**
